

Subject: Health Education working across Kent, Surrey and Sussex survey invite to inform training programme to improve the delivery of different news in maternity care

Improving the delivery of different news to mothers and their families by healthcare professionals

We are developing a training programme for healthcare professionals to improve the delivery of different news to parents about an unborn or newly born child having a congenital disorder associated with a learning disability.

We would like to invite you to take part in an online survey. The survey takes no longer than 15 minutes to complete. The survey results will be used to inform the design of the training programme. Individual responses to the survey will not be shared with your employer. No personal details are collected as part of the survey. The survey can be accessed following this link or you can copy and paste the address into your internet browser.
